

SATWIPES® Wipes (Acetone)

Presaturated 100% lyocell (rayon) wipes with acetone

SATWIPES® with 8642 aerospace fabric consists of a roll of saturated wipes dispensed through a reusable center-pull canister with a self-closing lid. The wipes are 100% lyocell (rayon) fabric that is hydraulically entangled, creating a soft, durable, and clean wipe that provides safe, consistent solvent application and use. Presaturation eliminates the need for solvent bottles, reduces solvent handling and solvent use by up to 35%, and improves the consistency of wipe wetness, which allows for a more uniform distribution of solvent.

SATWIPES are tailored to specific tasks in your facility. This ensures that the right size wipe with the correct amount of solvent is used each time. Durable reusable canister with self-closing lid reduces waste, solvent use and VOCs. *Meets current revision of specification AMS3819.*

Contec standard canisters are made of High Density Polyethylene (HDPE) and are both reusable and recyclable. These canisters have been proven to withstand contact with the harshest of solvents. The triple threading ensures that the lid (when screwed on properly) will stay on the canister. The variety of lids choices ensures that there is a lid to respond to every need.

Acetone is excluded from the definition of VOC per 40 CFR Part 51.100 on the basis that the compounds have been determined to have negligible photochemical reactivity.
