

SorbMore® RapidRescue™ Absorbent Pads

Fast-acting absorbent pad designed to quickly contain and signal spills

The SorbMore® RapidRescue™ absorbent pad from Contec Professional is an innovative solution for managing liquid spills efficiently and safely. Designed with high absorbency in mind, these 16" x 20" pads quickly soak up water- and oil-based liquids, reducing slip hazards and streamlining cleanup operations. The bright yellow surface features a universal caution symbol along with a clear "Caution Wet Floor" message in both English and Spanish, immediately alerting staff and guests to potential danger.

Constructed with a slip-resistant material, RapidRescue stays securely in place once deployed—potentially eliminating the need for additional signage or cumbersome floor cones. Ideal for use in healthcare facilities, schools, commercial buildings, and public spaces, the pad's dual-purpose design enhances safety and response time during unexpected spills. Whether used by environmental services teams or janitorial crews, Sorbmore RapidRescue empowers staff to act fast and stay compliant.

Instantly absorb spills and alert foot traffic with this dual-action safety pad—engineered for fast response and reliable slip prevention.

Features			
Quickly absorbs water- and oil-based liquids to reduce slip risk			
Slip-resistant backing helps keep pad in place on floors			
Bright yellow pad includes bilingual "Caution Wet Floor" messaging			
Sized at 16" x 20" for effective coverage of common spills
