

# Of the EVS Specialists Surveyed during the 2018 AHE Exchange:

But only

**8%**

correctly recalled the number of steps, per HLAC, to process a load from dirty to clean

**>100**

Number of steps, according to HLAC, to process laundry from dirty to clean.

Fewer Than  
**1-in-5**

EVS leaders trust their facility's laundering system  
"Completely"

**11%**

Percentage of EVS specialists who would "Definitely" drink a glass they had just wiped with a recently laundered mopping pad

Percentage of EVS professionals who think **HOARDING** clean textiles among staff is a problem in their facility

**Q:** What's your hope of something better?

**A:** "Go to a disposable solution that would work for everyone involved, since they're treating [laundered textiles] like they are disposable anyway. I just think that it'd be a more sterile environment."\*\*
