

Don't Take Chances. TAKE CONTROL.™

The truth is that microfiber only works well the first time it's used. After that, it's a magnet for nastiness! Contec® Laundry-Free™ Premira® Microfiber Pads & Wipes produce a superior clean every time!

Why Contec® PREMIRA® Works		Contec®	Relaunched Microfiber
	Tackles Bacterial Cross-Contamination. <i>Patients are less at risk from residual bacteria being spread due to poor laundering.</i>	✓	✗
	Helps Reduce Residual Contamination. <i>Relaunched mops can redeposit dirt and residual soap that leave floors dingy.</i>	✓	✗
	Superior Cleaning. <i>Floors are demonstrably cleaner and brighter after using Premira (ATP and gloss meter results).</i>	✓	✗
	Improved Operator Engagement and Compliance. <i>Lighter, ergonomic design and cleaner, more efficient cleaning experience.</i>	✓	✗
	Allows Chemicals to Do Their Job. <i>Won't neutralize cleaning and/or disinfectant actives. Releases fluids evenly and promotes consistent dwell times.</i>	✓	✗
	Consistent, Efficient Process. <i>Eliminate all the steps and logistics involved in getting mops to/from laundry, sorting, washing, and drying. Reduces mop hoarding.</i>	✓	✗
	Reduces Costs. <i>Proven to consume less chemicals, water, energy, and LABOR!</i>	✓	✗
	Electronics Safe. <i>Relaunched microfiber may contain sand, grit, and contamination which will damage sensitive electronic screens.</i>	✓	✗
	See the Difference. <i>Literally! Clean, white disposable mops eliminate the need for color coding and results are immediately visible to the operator.</i>	✓	✗
